

=====

KLARTEXT CYBERSECURITY AND DATA POLICY

=====

Document ID: SEC-2026-V1

Effective Date: July 18, 2026

Classification: Internal Corporate Standard

SECTION 1: PASSWORD AND AUTHENTICATION MANAGEMENT

All employees, contractors, and third-party vendors accessing the internal network must utilize Multi-Factor Authentication (MFA) at all times.

Password complexity requirements are strictly enforced as follows:

1. Minimum length of 16 characters.
2. Must contain at least one uppercase letter, one lowercase letter, one numerical digit, and two special characters (e.g., !, @, #, \$, %).
3. Passwords must be rotated every 90 days.
4. Re-use of any of the last 5 historical passwords is strictly prohibited.

Account Lockout Threshold:

If a user inputs an incorrect password 5 consecutive times, the account will be automatically locked for a duration of 30 minutes. To unlock an account prior to this window expiring, the employee must contact the IT Helpdesk directly via secure voice verification.

SECTION 2: DATA RETENTION, DISPOSAL, AND HARDWARE ACCUMULATION

Corporate data storage is divided into tiers based on sensitivity.

1. Customer Personal Identifiable Information (PII): Must be encrypted both at rest and in transit using AES-256 standards. PII data cannot be stored on local machine drives under any circumstances.
2. Financial Records: Retained for a mandatory period of 7 years to comply with regulatory tax audits, after which it must be scrubbed using certified digital shredding tools.

SECTION 3: CLEAN DESK POLICY AND PHYSICAL SECURITY

Employees working within the corporate office space are required to lock their computer workstations (Windows Key + L or Command + Control + Q) any time they step away from their desks, even if only for a brief moment.

No sensitive documents containing customer data, API access credentials, or source code structures may be left printed out on desks overnight. All physical papers must be deposited into the designated locked shredding bins located near the primary elevator bay.
